Re: PCB-Impacted Soil at AOC S-7
Patrick Draw Natural Gas Plant, Wyoming

Dear Mr. Harvey:

I am responding to your August 13, 2013 letter requesting approval of your PCB cleanup proposal for the Patrick Draw Natural Gas Plant, Sweetwater, Wyoming. The U.S. Environmental Protection Agency Region 8 has cooperated with the Wyoming Department of Environmental Quality in a review of the PCB-impacted soil areas and the proposed remedial activities at the plant.

Pursuant to the authorities in the Toxic Substances Control Act, 15 U.S.C. § 2601 Section 6(e), and the PCB Regulations at 40 CFR 761.61(c), the EPA approves the proposal of the installation of a cap as described in the August, 2013, Revised Interim Corrective Action Plan. In accordance with Section 6.2 of the Plan, TRC shall submit, within 90 days from the last cleanup activities at the site, a report including appropriate documentation on the remedial activities and a copy of the deed restriction records presenting the final site conditions.

Please contact Francis Tran of my staff at (303) 312-6036 if you have questions regarding this approval.

Sincerely,

A handwritten signature in blue ink, appearing to read "Derrith R. Watchman-Moore", is written over a circular stamp.

Derrith R. Watchman-Moore
Assistant Regional Administrator
Office of Partnerships and Regulatory Assistance
